LIBERAL WRIT IN BULK.

Half-way through the year, the Liberal party had a promising start, with many new members joining in support of their cause. This is evident from the news that a large group of supporters have signed up to help with the upcoming elections. The party is currently working on a campaign strategy to gain more votes and secure victory in the upcoming election. 

ELEMENTARY EDUCATION.

A FURTHER EXTENSION.

AGRICULTURE, WOODWORK, AND DOMESTIC SCIENCE.

The Minister of Agriculture has recently announced that there will be an extension of elementary agriculture, woodwork, and domestic science in the schools. This move is aimed at providing students with a more comprehensive education that prepares them for future careers. The minister has stated that these subjects are crucial for the development of a well-rounded individual and will be implemented in all schools.

CHAIR OF METALLURGY

Professor for Melbourne

FREMANTLE TODAY.

Among the passengers by the Moresby was Major J. H. Woodroffe, who is going to take the chair of metallurgy at the Melbourne University. During the voyage he was presented with a bell by the officers of the ship, and was also given a present of Australian soil. He is expected to arrive in Melbourne at the end of the month.

MADE PEOPLE THINK.

But if the war made people think, did it make them do anything? The answer is yes. The war had a profound effect on people's thinking. It forced them to question the values and principles that they had held dear for so long. It made them wonder if they were living life to the fullest, and if they were making the most of their time on earth.
