ROSEWORTHY COLLEGE

A Progressive Institution.

Great interest was taken in the annual distribution of diplomas and prizes at the Roseworthy College. The Minister, Mr. W. J. Cooper, presided, and many prominent persons were present, including Mr. C. G. Power, Mr. H. G. Coster, and Mr. J. R. Cowie. The Minister congratulated the college on the rapid progress it had made and commended the students for their hard work and dedication. He praised the college for its contribution to the agricultural education and training of young men. The occasion was marked by the presentation of awards to deserving students, and the new building was officially opened.

Agricultural Education

Pitfalls to be Avoided.

An interview was given by the Principal of the Roseworthy Agricultural College, Mr. W. J. Cooper, to a journalist. He discussed the importance of agricultural education and the need to avoid certain pitfalls. He emphasized the importance of practical experience and the need to balance theoretical knowledge with hands-on training. He also stressed the importance of continuous improvement and adaptation to new technologies and practices.

The Scientific Farmer

The history of advertising contains a profound truth of the fact that the professional man and his interests, have been a useful obstruction in the onward progress of agricultural education. The usage of which has been so consistently held by the scientific farmer, and the practical method pursued by Mr. J. R. Cowie, that he has the advantage of being the most skillful and faithful in his profession. In the too-stricture limited course of study at Roseworthy College, the student is shown to what extent the student should never be separated by a wide gulf, or, if by any gulf at all, it is to be a gulf that shall be used as a means to induce the student to acquire the necessary knowledge and skill in the critical points of the business. The breadth of the student is a natural and necessary part of the education of a scientist.
