THE WORLD'S FOOD SUPPLY.

Possibility of a Failure.

The problem of the world's food supply gets more and more involved as the years go on. The problem of world agriculture is a problem not only for those who grow food but for those who eat it. The problems of the future are not far distant. The world is facing a problem of food shortage. The world's population is increasing, and the demand for food is increasing. The problem is not only a question of the amount of food produced, but also a question of the distribution of the food. It is a problem of economics, politics, and social organization.

G. E. W. "The problem is not only a question of the amount of food produced, but also a question of the distribution of the food. It is a problem of economics, politics, and social organization.
