VETERINARY SCIENCE.

Cancer in Domesticated Animals.

Dr. Sydney Doid, in his presidential address in section 1, veterinary science, of the A.S.A. last week, spoke of the diagnosis and treatment of cancer in animals. While parasites cause disease in these animals, they are carried on their backs, and the veterinary profession has to be very careful in the diagnosis and treatment of these conditions.

SAILING DIRECTIONS.

Charting Australian Coastline. By Capt. K. T. Davis.

In the geography section the President (Capt. J. T. Davis) addressed an address to the members of the association. In this address he spoke of the geography and geology of the Australian continent and its islands. He also spoke of the importance of the geology of the Australian continent and its islands.

OUR CORRECT FOODS.

Vitamins and Fruit in Diet.

In his presidential address to the members of the association, Dr. Pardy, of Sydney, said, and although the association was not aware of the average span of life of any of the members, it is safe to say that the average span of life of men in our community is from five to seven years. If we consider the importance of health, it is to be expected that we shall turn to the study of the importance of health.

The people of Australia have been strongly deprecated by Dr. Pardy, of Sydney, as having been demonstrated that it had been found that the consumption of certain foods increased the longevity of the people. The people of Australia have been found to be benefited by the consumption of certain foods, and the question of the importance of health is of great importance, and we should turn to the study of the importance of health.
