Electricity in Victoria.

Sir John Atkinson announced the details of the new Electricity Scheme of Victoria, and the methods by which it will be carried out. The new scheme will be carried out by the Victorian Government, and the Victoria Electricity Commission. The scheme will involve the construction of new power stations, the extension of existing lines, and the provision of new substations. The scheme will be financed through a combination of government and private funds, and will provide for the supply of electricity to all parts of the state.

Native and Primitive.

Professor Orestis Smith said that the Native and Primitive peoples of the world have played a significant role in the development of human civilization. He noted that these peoples have a rich cultural heritage and have contributed to the advancement of science, technology, and the arts. He also emphasized the importance of preserving and promoting the traditions and ways of life of these peoples.

The Federal Government.

The Federal Government has been working hard to develop policies and initiatives that will address the needs of Australia's diverse population. It has been focusing on issues such as education, health, and housing, as well as on the development of policies that will support economic growth and social cohesion.

The Australian Soldier.

Sir John Monash returned thanks to the President of the Science Association for his speech. He noted that the Science Association had a broad and comprehensive purpose and duty. It did not aim to foster a particular branch of scientific knowledge, but to gather into its fold all the different branches. Such meetings as the one now being held, where people of all ages and from various parts of the country, met to discuss and to exchange the latest research and advancements in science, were of great value in promoting scientific progress.
