EDUCATIONISTS MEET Universities’ Conference

BEGINS THIS AFTERNOON

Delegates from the university of all Australian States are attending an inter-university conference, which begins this afternoon.

The conference is being held at the General Assembly of the University of Melbourne. The meeting will be attended by delegates at dinners at the General Assembly Hall.

Mr. Geoffrey Murray (Chairman of the conference) will open the meeting.

Appalling Melbourne Statistics

Appalling statistics on the terrible scourge of The Plague in Australia were quoted on Thursday by Mr. James Barrett, of the Melbourne University. He said that the people who died in the Melbourne Hospital were suffering from the disease, and that the statistics showed that 8 per cent of the mothers were similarly affected.

The experts have been unable to determine the cause of the disease in this country. It is not known whether the disease is caused by a virus or by a bacteria.

The disease has spread rapidly throughout the country, and the authorities are now taking steps to control it. The government has issued a number of orders to prevent the spread of the disease, and these have been followed closely by the public.

The situation is serious, and the authorities are working hard to bring it under control. The public is urged to co-operate in all efforts to prevent the spread of the disease.

MEDICAL CONGRESS

Additional Papers

The Medical Congress is being held in conjunction with the conference of the Commonwealth of Australia in cooperation with the government. A wide range of topics will be discussed, with the aim of improving medical services in the country.

The conference will feature a number of keynote speakers, including experts in various fields of medicine. The topics to be discussed include mental health, surgery, and pediatrics.

The conference is being held in a state-of-the-art convention center, with modern facilities and amenities. The goal is to provide a comfortable and productive environment for the delegates.

The Medical Congress is an important event for the medical community, providing a platform for discussion and collaboration. It is a unique opportunity to learn from experts and to contribute to the development of the field.
