DUNTRONE MILITARY COLLEGE.

TRANSFER OF CONTROL RUMOURED.

It is proposed, according to a recent report received by the Advertiser, that the Duntroon Military College may be transferred from the control of the Government to that of a University. This proposal was considered at a meeting of the University Council in Sydney, and the possibility of such a transfer was discussed. The proposal is based on the recommendation of the University's Council, which believes that a transfer to the University would be beneficial to the College and its students.

MARSUPIAL BIRTH.

MARSUPIAL BIRTH.

To the Editor,

Sir—Popular interest being again awakened by the discovery of a new species of kangaroo, it is worth while to mention that the discovery of a new species of marsupial was made by Mr. J. A. Godfrey of the Zoological gardens in Sydney.

Wood Jones, in his article on the subject of marsupial reproduction, states that the embryo of the marsupial is not entirely formed within the mother's body, but is born at an early stage of development and continues to develop in the pouch of the mother. This discovery has been hailed as a wonderful achievement, and the discovery of a new species of marsupial is a matter of considerable interest.

I am, etc.,

J. A. GODFREY.

MARSUPIAL BIRTH.

To the Editor,

Sir—The discovery of a new species of marsupial is of great interest, and it is to be hoped that the new species will be named in honour of Mr. J. A. Godfrey, who has been responsible for the discovery.

I am, etc.,

J. A. GODFREY.

The Advertiser.

PUBLICATION OF THE ADVERTISER.

In making itself the guardian of the physical well-being of the people of the State, the Advertiser has taken as its motto “Prevention.” No longer is the Advertiser satisfied with mere diagnosis of disease; it extends to the investigation and elimination of causes. The amount of work has been achieved in the States through its public health department, and the assistance of its paid staff.

In view of the high cost of medical care, it is difficult to find sufficient funds for the publication of the Advertiser. The demand for the service of the organization of the health systems of the States on a central and uniform basis is more pressing than ever. It is in this spirit of cooperation that the Advertiser is publishing this issue.

I am, etc.,
