DR. HEATON RESIGNS

Says Economists Should Travel

REGRET AT LEAVING

Dr. H. Heaton stated this morning that he had advised the Agricultural Council of Australia of his resignation, thereby ending his association with that body. His resignation was accepted by the Council, and the position of Director of the Agricultural Council was offered to him on the resignation of Dr. W. E. Heaton, who has accepted the position of Professor of Agricultural Economics at the University of Sydney.

Dr. H. Heaton has been associated with the Agricultural Council for the past six years, and has rendered valuable service to the Council in his capacity as Director. He has been particularly interested in the development of agricultural education in Australia, and has rendered valuable service to the Council in his capacity as Director of the Agricultural Council for the past six years, and has rendered valuable service to the Council in his capacity as Director of the Agricultural Council of Australia. His resignation represents a great loss to the Council, and his services will be sorely missed.

Medical Research Work

Valuable research work has been conducted at the Agricultural Council, and the Directors are particularly interested in the work being done by the Council in the field of medical research. They have expressed their appreciation of the work done by the Council in the field of medical research, and have urged the Council to continue its work in this field.

Practical sympathy in the photo of news in the newspapers is a marked characteristic of the Council's work, and the Directors are particularly interested in the Council's work in the field of medical research. They have expressed their appreciation of the work done by the Council in the field of medical research, and have urged the Council to continue its work in this field.

Buried in the laboratories behind the Council's building is a patient investigator who has been seeking for many years for the solution of the problems of human health. The Council's work is not only of scientific importance, but it is also of practical importance, and the Directors are particularly interested in the Council's work in the field of medical research. They have expressed their appreciation of the work done by the Council in the field of medical research, and have urged the Council to continue its work in this field.

Dr. H. Heaton has been associated with the Agricultural Council for the past six years, and has rendered valuable service to the Council in his capacity as Director. His resignation represents a great loss to the Council, and his services will be sorely missed.
