UNIVERSITY PROBLEMS ABROAD

BUILDINGS CROWDED OUT WITH STUDENTS

Before the Graduating Association, Dr. Heaton, who described his duties as University Problems in Europe and America, warned the students that they would be crowded out with students unless they took care to avoid the buildings now being erected on the campus. The buildings, he said, were already being used by students for their private study and consultation, and he urged them to avoid the crowded conditions that now prevail.

FEDERAL FORESTRY

A Programme Outlined.

The Minister for Home and Territories (Mr. Forrest) has released a programme for the Federal Forestry programme whereby a new system of forest management will be introduced. This will relate to the establishment of a comprehensive system of forest reserves and the implementation of a programme of reforestation and forest management.

NATIONAL FORESTRY SCHOOL

The National Forestry School, which is to be established in Canberra, will have a capacity of 1,000 students and will offer courses in all aspects of forestry, including silviculture, forest management, and forest conservation.

UNIVERSITY PROBLEMS

FORESTERS BUT NO FORESTS

Forestry has always been the Cinderella of State governmental activities in Australia, and recent reports from the records of the land and water commissions show that the work is being done by the State Government with little, if any, assistance from the Federal Government. The only forests in Australia are the forests of the Federal territories, and the only forests in the Federal territories are the forests of the National Forestry School, which is to be established in Canberra.

FORESTERS BUT NO FORESTS

The National Forest Commission, which is to be established in Canberra, will have a capacity of 1,000 students and will offer courses in all aspects of forestry, including silviculture, forest management, and forest conservation.

NATIONAL FORESTRY SCHOOL

In the middle of the year, the President of the National Forest Commission, Mr. Forrest, released his annual report, which showed that the National Forest Commission had made steady progress in its work. The report stated that the National Forest Commission had already established a network of forest reserves and had begun to implement a programme of reforestation and forest management.

FORESTERS BUT NO FORESTS

The National Forest Commission, which is to be established in Canberra, will have a capacity of 1,000 students and will offer courses in all aspects of forestry, including silviculture, forest management, and forest conservation.
