SCIENCE AND THE FARM

Valuable Work of Waite Institute

DR. RICHARDSON ENTERTAINS GRADUATES

Members of the University Graduates' Association were entertained at the Waite Institute this afternoon by Dr. A. E. V. Richardson.

The doctor told the graduates that there was vast scope for research work in Australia, but much must elapse before the full benefit was shown in an increase of primary production.

About 200 graduates attended. Before the meal Dr. Richardson spoke of the value of research work in agriculture. He said that $200,000 a year would make a big difference. The land behind the three men present was worth $200,000 a year.

The Waite Institute was established by Mr. Malcolm Macdonald, one of the Oxford University debating union, under the title of "University Debates."

The task of the Institute had been to promote scientific and technical research and educational work in agriculture, and the Institute had been working on the principles of the Oxford University debating union.

MUSIC EXAMINATIONS AND THE UNIVERSITY

From Earri, Adelaide, April 24, Pro Musica Society announces that they have bought an organ at Trinity College of Music, London. This organ is one of the finest in the world, and is attached to the present practice of the College.

ELDER CONSERVATORY

STUDENTS' CONCERT

There was a large attendance at the Elder Hall last evening to hear the music of the various students of the Elder Conservatory. The evening was well filled, and the students played well.

The programme included works by Franck, Beethoven, and Schumann. Miss Desmarais, the director of the Elder Conservatory, was in charge of the evening.

The students played with great skill and assurance, and the programme was well received by the audience.

The concert was preceded by a recital of songs by Miss S. Harvey, Miss M. Murray, and Miss P. Taylor, who sang with great feeling and precision.

The concert was a great success, and it is hoped that similar events will be held in the future.

Value of Research

The permanent rotation lecture series is being given by Dr. A. E. V. Richardson at the Waite Institute. The lecture will be given every Thursday evening at 8 p.m.

Dr. Richardson is a well-known agricultural scientist, and his lectures are always well attended. He has made many valuable contributions to the science of agriculture, and his work has been widely acclaimed.

The lecture will deal with the value of research in agriculture, and Dr. Richardson will discuss the importance of research in the development of agriculture in Australia.

Laboratory Work

The laboratory at the Waite Institute is one of the most important in the country. It is equipped with the latest apparatus and is staffed by experts in the field of agricultural research.

The laboratory is open to students and researchers, and it is a valuable resource for those who are interested in the field of agriculture.

The lecture will be given by Dr. Richardson, and it will be a great opportunity for those who are interested in the science of agriculture to gain a better understanding of the importance of research in this field.
