MALE ASPIRANTS

A THOUGHT FOR TODAY

In argument they own their
wonders and
Although vanished he
could argue still—

GOLD STANDARD

Dr. Heston to Lecture

The widespread discussion on the sub
ject of a return to a currency with a
gold standard has been increased by the financial and economic conditions
that have been and are in existence today. The references to the gold standard
are to be found again and again as follows:

1881-1891
1891-1897
1897-1901
1901-1904
1904-1907
1907-1908
1908-1909
1909-1911
1911-1913
1913-1915
1915-1918
1918-1920
1920-1922

From these figures it is seen that since
the collapse of the gold standard in
Canada, in 1931, the prices of most goods
have doubled. This is due to the fact that
everything must be much more expensive
in order to make the same amount of money
worth the same as before. The result is
that the prices of labor and materials have
doubled, and the cost of living has increased
doubly.

Period of Progress

After that we settled down to steady
increase at the rate of just over 2 percent
a year. It is probable that in
the next few years of our century
we shall see a steady increase of wealth
per head, and a rise in the standard of living.

NEW LAWYERS

Eleven Candidates

TWO WOMEN INCLUDED

November legal practitioners will be
impressed when they meet
the 11 new lawyers, of whom
four are women. They are:

- Mrs. W. H. McLachlan
- Miss M. W. McLachlan
- Miss M. A. McLachlan
- Miss M. B. McLachlan

Three of the women are the daughters of
Mr. W. H. McLachlan, who is one of the
leaders in the legal profession.
