EDUCATIONAL DEVELOPMENTS

LECTURE BY DR. HEATON.

Dr. Heatmon, in a large address at the Institute Building on "The Social and Economic Significance of Higher Education," on March 9th, when Dr. Heatmon opened the annual meeting of the Institute of Education, said that the great significance of the work of the Institute was that it was a means of raising the standard of education in the country. He had found that all forms of educational work were being conducted in the Institute, and he was confident that the Institute would be able to make a real contribution to the education of the country. He had been impressed with the fact that the Institute was being conducted with great energy and enthusiasm, and he was confident that it would be able to make a real contribution to the education of the country.

PROFESSOR ROBERTSON'S IDEAS.

On Speaking of the teaching of science to schoolboys, Professor Robertson, in a recent address to the School of Education at the University of London, said that the teaching of science required a special kind of training. He said that the teaching of science should be based on a sound knowledge of the subject, and that the teacher should be able to communicate this knowledge to the pupil. He also stressed the importance of the teacher's own enthusiasm for the subject, which would inspire the pupil and make the teaching more effective.

TEACHING SCIENCE.

A description of the work of the School of Education, in which Professor Robertson has been one of the leading figures, was given in a recent address by Mr. M. H. Curran, the head of the School. Mr. Curran said that the School was making a great deal of progress in the teaching of science, and that the results were already showing themselves in the improved standard of education in the country. He said that the School was now making a great deal of progress in the teaching of science, and that the results were already showing themselves in the improved standard of education in the country.

THE SCHOOL OF FORESTRY.

COMMONWEALTH AID Sought.

PRIME MINISTER SYMPTOMATIC.

A description of the work of the School of Forestry, in which Professor Robertson has been one of the leading figures, was given in a recent address by Mr. M. H. Curran, the head of the School. Mr. Curran said that the School was making a great deal of progress in the teaching of science, and that the results were already showing themselves in the improved standard of education in the country. He said that the School was now making a great deal of progress in the teaching of science, and that the results were already showing themselves in the improved standard of education in the country.

Confederation of University Musical Societies.

Arrangements are in hand for holding another conference of music teachers in Adelaide and Melbourne during the current year. Members of the staff of the Adelaide Conservatorium of Music, and the University of Melbourne, will take part in the conference, and a programme of lectures and demonstrations will be arranged. Mr. G. H. Pearce has been elected as secretary, and it is expected that the conference will be held in July.

THE PAVIA UNIVERSITY.

The Council of the University, in a recent meeting, approved the appointment of Mr. L. H. Brown, a lecturer in the University, as the head of the School of Agriculture. The Council also approved the appointment of Mr. A. H. Jones, a lecturer in the University, as the head of the School of Veterinary Science. The Council also approved the appointment of Mr. A. H. Jones, a lecturer in the University, as the head of the School of Veterinary Science.
