THE SPANISH WAR IN AFRICA.

Is it a Religious War?

By Archibald T. Strong, Professor of English Literature in the University of Adelaide.

An interesting comment upon Spain's position in Morocco and Spain's position in Morocco is found in the November 22nd number of 'The Financial Times.' This paper states that, although Spain is interested in Morocco, she is not likely to take any direct action in the present crisis. Spain has always been very careful in her dealings with the Moroccans, and has never interfered in their internal affairs, except when absolutely necessary. Spain's policy has been to maintain the Moroccans in their present state, and to prevent any attempt at revolution from taking place.

The Moorish question is a very delicate one, and Spain has always been careful to avoid any interference in the internal affairs of the country. The Moroccans are a very independent people, and Spain has always been careful to respect their wishes and customs. Spain's policy has been to maintain the Moroccans in their present state, and to prevent any attempt at revolution from taking place.
