Canada and Australia.

Lecture by Dr. Heaton.

The Public Library lecture-room was filled with a dense crowd when Dr. Heaton appeared on the platform. This was the second lecture of the Workers' Industrial Association, and Mr. E. H. Heaton was in the chair.

Dr. Heaton, who recently spent three months in Australia, read a paper on references to points of similarity and contrast between Canada and Australia, and the athletic heros with which he is familiar.

The lecture, which was of a descriptive nature, took the form of a series of delightful and piquant illustrations from the life of the Sydney and Melbourne athletic heroes. Dr. Heaton compared the athletic heros of both countries, and showed the manner in which the athletic heros of both countries are keenly interested in each other's activities.

The lecture was received with a hearty ovation, and the audience expressed their appreciation of the interesting and amusing lecture.

The Real Gentleman of Europe.

By Archibald Strong, Professor of English Literature in the University of Berlin.

Can a nation which has failed in warfare and the administration of its splendid colonies through incompetence, and has of late years contrived to make a world's welfare in science, scholarship, or art, be regarded as a typical modern nation? If not, it would probably answer no to one of the questions which certainly covers the foundations of national character. It is too early to judge men and nations by practical results, and to regard experience as a trustworthy test.

It is, moreover, a fact that most men of letters who have visited Europe during the last few years are of opinion that the more modern forms of national character will probably turn away from the present-day Spain, and feel impelled to go back to the Spain of the past. To go to Seville, and the beautiful country of Spain, is to go back to the past. But not only the past.

The Domination of the Spanish.

From the first, the Spanish national hero, Spain, down to the humblest water-carrier, everyone expects to be treated as a "Catholic," and therefore one of the insinuated meanings of this word is that Spain is a nation of simple, honest, and kind-hearted people. The name of Spain is so closely connected with the name of "peace" that one cannot help associating the two.

But the real problem is how to reconcile the two.

The Modern Spaniard at Home.

The University of Adelaide.

Examination Results of Euphemistic Examinations.

Sixth Year

Principles and Practice of Surgery.—Schott. Clinical surgery.—Way, Nill, Maloney. (Final examination.)

Supplementary examination for Degree of Bachelor of Medicine, of candidate for degree of Doctor of Medicine.

Pharmacy.—(Papers not classified.)

Examination for Degree of Bachelor of Dental Surgery.

Pathology.—(Papers not classified). Completing the examination.

First Year

Anatomy.—Christie, J. V. (Passed examination.)

The University of Adelaide.

Examination Results.

Special Examination for the Degree of B.A., and B.E.

Geology of the Southern Alps.—P. O. (174.)—Geological Survey of Victoria, 17th Jnwife, 1874. (Short Course.)

First Year, 1874 (Short Course).

First Year, 1874 (Short Course).

Second Year, 1874 (Short Course).
