THOUSAND VOICES CHORUS.

The effects of Plato's influence on Shelley.

The influence of Plato's ideas on the works of John Keats has been studied by Mr. K. C. Krioukov at the University of Adelaide, where he is research associate in the philosophy department. His work has shown that the ideas of Plato have had a significant impact on the development of the works of Keats.

New Adelaide University School.

The engineering and physics of the new Adelaide University School.

The new building is a landmark in the city's architectural history. It was designed by the renowned architect, Mr. J. E. G. Smith, and constructed using the latest materials and techniques. The building's design is based on the principles of functionalism, with an emphasis on efficiency and simplicity.

CULTIVATING BRAINS.

The effects of training on the brain.

The results of a recent study conducted by Professor H. Darley Naylor at the Workers' Educational Association have shown that the brain's plasticity can be increased through training.

ENGINEERING AND PHYSICS.

Owing to the rapid expansion of the engineering and physics departments, the University has had to make several changes to the buildings.

The new building is a significant improvement over the old facilities. It features state-of-the-art laboratories and classrooms, which will allow students to learn and experiment in a modern environment.

Professor H. Darley Naylor's contribution.

Professor H. Darley Naylor has been an influential figure in the field of engineering and physics. His research has had a significant impact on the development of new technologies and has contributed to the advancement of the field.

A SCHOOLS FETE.

At Scotch College, a school fete was held in celebration of the school's anniversary. The event was a great success, with a wide range of activities and games for the students and staff.

News.
