UNIVERSITY CLUB.

SUCCESSFUL INAUGURAL SOCIETY.

A representative gathering of Adelaide University students on Friday evening last attended the successful inauguration of the University Club at the Music Hall. Following an address by Professor T. Bradley Robertson, the president of the University Council, the members proceeded to the assembly room where a dinner was served. A vote of thanks to Professor Robertson was passed, and the meeting was then adjourned.

Membership and Club Facilities.

The membership of the club is now 739. The organization was formed on December 13, and business was transacted including the selection of officers for the coming year. Prior to the completion of the new hall, meetings will be held in the private rooms of the university.

THE TRAMWAYS BAND.

To the Editor.

The various groups may be divided into those interested in athletic contests and those interested in music. The latter, however, are not always recognized. It may be said that the music is the most important part of the group. The band, as a whole, is the most important part of the group. The band is the most important part of the group. The band is the most important part of the group.

Astronomical Advancement.

Progress in America.

Mr. Dodwell's Experiences.

Highly enthusiastic about the astronomical society of the Sierra Nevada and the new field of scientific discovery, Mr. G. F. Dodwell, who has been on special leave, returned to Adelaide on Monday from six months' sojourn in America and Canada.

On Monday Mr. Dodwell spoke of the astronomical and scientific wonders of the North American continent. He first visited California, where the Mount Wilson Observatory has been established, and the Mount Wilson Observatory, on the latter. At Mount Hamilton, a copy of the photograph was taken. Mr. Dodwell was present with a copy of the photograph. The photograph was taken by the use of a spectrograph and plates of photographs, and was the greatest distance from any terrestrial object. The photograph was taken by the use of a spectrograph and plates of photographs, and was the greatest distance from any terrestrial object. The photograph was taken by the use of a spectrograph and plates of photographs, and was the greatest distance from any terrestrial object.

Dr. H. Heaton Returns.

Dr. H. Heaton, director of the British Children's Hospital, who was in London by the Montefiore, has returned to Adelaide after his visit to the Montefiore. He met with a great deal of success in London, and the hospital was able to purchase a great many of the latest appliances for the hospital.

Astronomical Significance.

The astronomical significance of the photograph was shown by the details of the planetary revolution which was found to be varying slightly. An entirely different view of the photograph was taken in Mount Wilson, California, and was the same as the original view. The photograph was taken in Mount Wilson, California, and was the same as the original view. The photograph was taken in Mount Wilson, California, and was the same as the original view.
