TAKING A YEAR'S COURSE COLLEGE WHILE ON EIGHT MONTHS TOUR.

The New York university admissions chairman, Mr. J. F. E. P. Jones, announced on Thursday that the university is accepting applications for the 1923-1924 academic year. The deadline for applications is January 1, 1924. The university offers a wide range of undergraduate and graduate programs, including law, medicine, and engineering. Information about the university and its programs can be obtained by visiting the website or contacting the admissions office. Applications can be submitted online or by mail. The university is located in New York City and is ranked among the top universities in the United States. Applications are available on the university's website.

CANCER INVESTIGATION.

Adelaide Doctor Abroad.

Dr. J. R. Davison, a well-known Adelaide physician, is at present in London, where he is conducting research on cancer. He has been invited to present his findings at a meeting of the Royal Society of Medicine. The meeting will be held on April 15. Davison's research on cancer has been widely acclaimed, and he is regarded as one of the leading authorities in the field. His work has been published in numerous scientific journals, and he has received several awards for his contributions to medicine. Davison's research is focused on the development of new treatments for cancer, and he is optimistic about the prospects for future advances. His visit to London is an opportunity to share his findings with other experts and to collaborate on new research projects. The meeting will be attended by leading scientists and policymakers, and is expected to be a significant event in the field of medicine.

SCIENCE CONGRESS IN PERTH.

Advancements are well in hand for the Australian science congress in Perth. The congress will be held from July 15 to 20, 1923. The congress is expected to attract a large number of attendees from across Australia and around the world. The organizers have made arrangements for accommodation, transportation, and other logistical support. Attendees will have the opportunity to attend a variety of sessions and events, including keynote speeches, panel discussions, and workshops. The congress will address a range of scientific topics, including astronomy, biology, chemistry, and physics. Attendees will have the chance to network with other scientists, share knowledge, and collaborate on new research projects. The congress is an opportunity for the Australian scientific community to come together and advance the frontiers of knowledge.
