Sir Ernest Rutherford Arrives

MAYORAL RECEPTION

Sir Ernest Rutherford, accompanied by Lady Rutherford, arrived in Adelaide on Saturday afternoon. A civic reception in honor of the distinguished scientist was held at the Town Hall by the Lord Mayor (Mr. C. J. Glover) and the Lady Mayoress. Among those present were Sir Douglass, President of the Royal Society; Sir James Hector, Director of the National Museum; Mr. H. Blandy, and A. A. Legge, President of the Royal Society (Government Astronomer), A. A. Foote, Professor of Chemistry, W. S. Bailey (Director of the South Australian Museum), and J. H. Blandy, President of the South Australian Institute of Physics, and the Mayor of Adelaide.

A Distinguished Scientist.

ARRIVAL OF SIR ERNEST RUTHERFORD.

A CIVIC WELCOME.

Sir Ernest Rutherford, accompanied by Lady Rutherford, arrived in Adelaide on Saturday afternoon. A civic reception in honor of the distinguished scientist was held at the Town Hall by the Lord Mayor (Mr. C. J. Glover) and the Lady Mayoress. Among those present were Sir Douglass, President of the Royal Society; Sir James Hector, Director of the National Museum; Mr. H. Blandy, and A. A. Legge, President of the Royal Society (Government Astronomer), A. A. Foote, Professor of Chemistry, W. S. Bailey (Director of the South Australian Museum), and J. H. Blandy, President of the South Australian Institute of Physics, and the Mayor of Adelaide.

A Distinguished Scientist.

AN INTERVIEW.

The study of the structure of the atom is a fascinating one, and one that has occupied the minds of the world. One of the most curious and living scientists of our time is Sir Ernest Rutherford, who is on an extensive tour of the world, including Australia. He is on an extensive tour of the world, including Australia.

Sir Ernest Rutherford was born in New Zealand, and he has been a prominent figure in the world of science for many years. He has made significant contributions to the fields of nuclear physics and chemistry, and his work has been recognized with numerous awards and honors.

Sir Ernest Rutherford is known for his leadership in the field of nuclear physics, and he has been a key figure in the development of the atomic bomb. His work has been crucial to the advancement of the field, and he has been a vocal proponent of the use of nuclear energy for peaceful purposes.

In his interview, Sir Ernest Rutherford spoke about his views on the future of the atom, and he expressed optimism about the potential for peaceful uses of nuclear energy.

A remarkable address.

The Brookman Hall, at the Ministry of Works and Housing, was filled to capacity on Thursday evening, when Sir Ernest Rutherford, President of the International Union of Pure and Applied Physics, gave an address on the structure of the atom. The gathering was made up of scientists, students, and the general public, and the room was filled with a sense of excitement and anticipation.

In his address, Sir Ernest Rutherford spoke about the history of the discovery of the atom, and he discussed the current state of our understanding of the atom. He also spoke about the potential for the atom to be used for peaceful purposes, and he expressed optimism about the future of the field.

Sir Ernest Rutherford concluded his address by reminding the audience of the potential for the atom to be used for good, and he urged everyone to work towards a future in which nuclear energy is used for the betterment of humanity.
