AFFORESTATION.

PROPOSED CENTRAL SCHOOL.

WHY NOT IN SOUTH AUSTRALIA?

A suggestion has been made that the proposed Commonwealth School of Forestry should be established in South Australia, because facilities already exist.

Complaints have been made by the South Australian Government in regard to the lack of facilities for forestry education. The Government has been urged to establish a school of forestry, but there are no facilities available. The suggestion is that the Commonwealth School of Forestry should be established in South Australia, because facilities already exist.

The latest available records show that the area under forestry reserves in South Australia is 2,289,851 acres, or about 3 percent of the total area of the State. The Eastern District of South Australia is the most forested, with an area of 1,579,014 acres, or 70 percent of the total area of the State. The Western District is the least forested, with an area of 610,766 acres, or 25 percent of the total area of the State.
