JAPAN LEADS IN CIGARETTE PRODUCTION

Recent figures from Japan's Ministry of Health and Welfare show that the country leads the world in cigarette production, with over 400 billion cigarettes produced in 2023. This is more than twice the production of the second-largest producer, China, which produced 175 billion cigarettes. Japan's dominance in this industry is attributed to its advanced technology and efficient production processes.

Another Scholarship for the University—At a meeting of the Adelaide University Council on Friday a lecture was read from the secretary to the Commission. The exhibition of 1901, the Commission appointed the University to be able to offer a scholarship to the University Library.

THE MACDONNELL RANGES

MR. W. A. HORN'S EXPEDITION

ITS PERSONNEL AND ROUTE

The expedition which Mr. W. A. Horn has undertaken is for the scientific exploration of the MacDonnell Ranges, and is expected to continue for several weeks. The expedition is composed of Mr. W. A. Horn, Mr. Charles Wimperis, Mr. G. H. Stirling, Dr. G. S. Stirling, and a team of aboriginal guides. The route will take them through the ranges, and will provide valuable information about the geology and flora of the area.

COURSES OF THE EXPEDITION

The object of the "Horn Scientific Exploring Expedition" is defined thus:

1. The scientific examination of the country from Redcliffs to the MacDonnell Ranges, and the collection of specimens illustrating the native flora, fauna, and geological structures of the region, and the investigation of any remarkable natural features of the country.

2. The securing of photographs of the aborigines in their primitive state, the collecting of information as to their manners, customs, and languages, and the reproduction by photography of their mural paintings in caves and on rock shelters.

THE MAMMALS OF THE EXPEDITION

Mr. W. A. Horn is a member of New South Wales, and he was born in 1831. Within the last twenty years of his life he has traveled extensively in various parts of the country, and has become a noted authority on the aborigines. Mr. Horn was engaged in the survey work in the District of Flinders and was associated with the survey work in the Flinders Ranges. He was afterwards engaged in the Royal Survey Commission, and was at various times engaged in the survey work in the Gawler Ranges and towards the north-east, and was for some years as Surveyor to the Survey Commission.

Mr. Horn is a member of the Staff Commission on the Hurley Ranges, and has been associated with the survey work in the Flinders Ranges. In 1832 he was engaged in the survey work in the Flinders Ranges and was associated with the survey work in the Gawler Ranges and towards the north-east, and was for some years as Surveyor to the Survey Commission.
