THE EVENING JOURNAL, SATURDAY, APRIL 14, 1894

EXPLORING THE INTERIOR.

MR. W. A. HORN'S SCIENTIFIC NEXT EXPEDITION.

The arrangements for the first go and equipment of the expedition which Mr. W. A. Horn is sending to the Macdonnell Ranges are now complete. Subject to their obtaining leave from their duties at the University of Adelaide, Professor Tate and Dr. E. C. Stirling, C.M.G., will be members of the expedition, and there is every reason to believe that the leaves will be granted. Professor Tate will have charge of the palaeontological and biological researches on the expedition, and Dr. Stirling will look after the ethnological department. Professor Swan of the University of Melbourne will conduct the studies in biology. The names of the other gentlemen in the expedition will be arranged when they arrive.

The Elder Scholar of Music.

We give the portrait of Mr. H. M. Wallace Kennedy, the new Elder Scholar of Music, who is leaving for England shortly. Mr. Kennedy, who is twenty years of age, was born at Port Adelaide. His father, Mr. W. H. Kennedy, was for some years a prominent member of the staff of the Bank of South Australia, and is now in the employ of the Commonwealth Bank. The late Captain Kennedy was a prominent member of the Port Adelaide Model and the Semaphore Collegiate School, after which he went into commercial life. He has been connected with the Press for many years, and is now the editor of the Semaphore Times. His music, which is of the highest order, is much appreciated, and he has had many pupils in the art. Mr. Kennedy is a very promising young man, and it is hoped that he will succeed in his studies.

MR. H. M. W. KENNEDY.

Mr. W. A. Horn's Scientific Expedition.

The arrangements for the scientific expedition which Mr. W. A. Horn is sending to the Macdonnell Ranges are now complete. Subject to their obtaining leave from their duties at the University of Adelaide, Professor Tate and Dr. E. C. Stirling, C.M.G., will be members of the expedition, and there is every reason to believe that the leaves will be granted. Professor Tate will have charge of the palaeontological and biological researches on the expedition, and Dr. Stirling will look after the ethnological department. Professor Swan of the University of Melbourne will conduct the studies in biology. The names of the other gentlemen in the expedition will be arranged when they arrive.
