FLINDERS CHASE.

The control and management of the research station, the offices, and the experimental farm at Flinders Chase, is carried on by a small staff of scientists and technicians, under the supervision of the Director, who is responsible for the general direction of the work. The station is equipped with modern scientific apparatus and is used for the study of the effects of different conditions on the growth and development of various plants.

Preparing for Citizenship.

A large number of school teachers attended the University of Adelaide, South Australia, for the period of the month of July, in connection with the Education Conference.

The first class of students attended the University of Adelaide, South Australia, for the period of the month of July, in connection with the Education Conference.

The chair at the morning session was occupied by Miss M. Gill, M.A., and the subject discussed was "The preparation of the child for citizenship." Miss F. H. Adsley and Miss A. Metcalf, B.A., were the speakers.

Mr. Duncan-Hughes was asked what was the importance of citizenship in the ideal state involved, devoted, and unambiguously, "The child must be taught that the lesson is the end of instruction, and that in the end the child must be taught to accept the responsibility that he is called upon to undertake."

The child must be taught to accept the responsibilities that he is called upon to undertake.

Training in Public Affairs.

It is the opinion of Mr. Duncan-Hughes that public affairs are related. He developed that the process of education is a process of training on Saturday night. Professor C. D. P. M. considered the education of the public affairs of society. He emphasized the importance of training in the mind of the child to accept the responsibilities of citizenship.

POLITICS AND EDUCATION.

The importance of training in public affairs is a common concern. It is the opinion of Mr. Duncan-Hughes that public affairs are related.
