FORESTRY.

The Need for a Wider Vision.

11—By E. Anthony, M.P.

The far-reaching influence of scientifically organized afforestation upon the prosperity of a country is often emphasized as to have become almost a truism. In the United States, the country with the most extensive forest industry, the work of the Forest Service is a major public service and has been an integral part of the nation’s social fabric for over a century.

The Forest Service was established in 1898, and since then it has been responsible for the conservation and management of forest resources. Its mission is to “conserve the nation’s forests and other natural resources and provide a strong foundation for future generations.”

The need for a wider vision is evident in the current challenges facing the forest industry. Climate change is altering the distribution of forests and the species that can thrive in different regions. In response, the Forest Service is working to develop strategies to adapt to these changes and ensure the sustainability of forest resources.

In addition, the Forest Service is responding to the growing demand for bioenergy and wood products. The agency is investing in research and development to increase the efficiency and environmental benefits of using wood as a fuel source.

Furthermore, the Forest Service is committed to ensuring that forests provide public benefits, including recreation, wildlife habitat, and water resources. To achieve these goals, the agency is collaborating with local communities, industries, and other stakeholders to develop and implement comprehensive forest management plans.

In conclusion, the need for a wider vision is essential to the continued success of the forest industry. By working together to address the challenges facing forests, we can ensure that these valuable resources will be available for future generations to enjoy and benefit from.

Mr. Gordon Ralph Piper, B.Sc., who recently attained the degree of Bachelor of Science at the University of Sydney, with credits in chemistry and mathematics, has been appointed by the Bank of New South Wales to the position of assistant manager in the southern division.

Mr. Piper was born at Orange, N.S.W., and attended the Western Australian College at St. Mary’s College, Sydney, where he graduated with a first-class degree in 1887. He then entered the Bank of New South Wales, where he has been actively engaged in commercial and industrial管理工作 for over 20 years. He is a member of the Institute of Bankers and a fellow of the Bankers’ Institute of Australia.

Mr. Piper has been appointed to the position of assistant manager in the southern division of the Bank of New South Wales, with a salary of £1,500 per annum, plus a bonus of £250 for the first year of service.

The appointment is expected to be effective from the 1st of January next year.

Mr. Piper is a member of the Board of Directors of the Bank of New South Wales and holds the position of vice-chairman of the Board of Governors of the Bank of New Zealand.

Mr. Piper has been actively involved in the development of the bank’s international division, which has recently expanded significantly. He has also been instrumental in the bank’s efforts to diversify its investment portfolio and expand its customer base in the Asia-Pacific region.

In addition to his banking experience, Mr. Piper has a deep understanding of the local economies and markets in the southern division of the Bank of New South Wales. This experience will be invaluable in helping to guide the bank’s strategic planning and decision-making in the years ahead.

Mr. Piper is married and has two children. He is a member of the local community and is actively involved in various charitable and educational activities in the area.
