Mr. Geoffrey Harry, LL.B.

Mr. Geoffrey Colin Harry, who graduated Bachelor of Laws in November, 1925, is expected to take the degree of Master of Laws in January next year.

Mr. Harry was a member of the committee of the Sydney University Law Society, and was one of the team which represented Sydney University in the inter-university competition held in Sydney in October last. Mr. Harry has been appointed a law officer in the Queensland Government service.

Mr. Rowland Robin Returning

A keenly sought Australian engineer, returning to Australia, shortly prior to adjourning his studies at the Massachusetts Institute of Technology, Mr. Robin was graduated Bachelor of Science in Chemical Engineering at the Institute in 1925. He is expected to take the degree of Bachelor of Science in Chemical Engineering at the Sydney University Chemical Engineering School in 1926.

Mr. Robin has been in the United States for about two years since his return from England. During this period he has been associated with the Water Research Board of the University of Washington, the Massachusetts State Board of Public Health, and the General Electric Company, and has worked on various projects in the engineering field.

The Need for a Wider Vision

In September, 1925, Mr. Harry Anthony, M.P., member for the New South Wales seat of the Commonwealth, addressed a meeting of the Forestry Institute in the University of Sydney. Mr. Anthony pointed out the importance of the study of forestry in Australia, and emphasized the need for a wider vision in the field of forestry education.

Forestry is now recognized as a profession, demanding a high standard of scientific training and study. The need for such training is becoming more evident, especially in the face of increasing demands for forest products.

The Fire Monarch

There are tremendous difficulties to contend with, none more so than the need to develop forest industries. In the past, many attempts have been made to control forest fires, but these efforts have been largely unsuccessful. The need for a fire control system is becoming increasingly obvious.

Encouragement of Private Enterprises

Encouragement of private enterprises in forestry is necessary. Although the government has been doing much to promote forestry, there is a need for more private enterprise to be involved. There is a need for more encouragement of private enterprises in forestry.

Mr. R. C. Robins, B.E.

Brilliant Scientist

Mr. R. C. Robins, B.E., a brilliant scientist, has been appointed a lecturer in the University of Sydney, and is expected to take the degree of Bachelor of Science in Chemical Engineering at the Sydney University Chemical Engineering School in 1926.

RESEARCH SCHOLARSHIPS

OFFERED TO AUSTRALIA.

The International Science and Education Commission of the United States is offering scholarships to Australian students for the purpose of furthering their education in the United States. The scholarships are open to Australian students who are willing to undertake one or more years of study in the United States. The scholarships cover tuition fees, living expenses, and travel costs.

For more information, please contact the International Science and Education Commission of the United States.
