ELDER CONSERVATORY

Successful Closing Social

About 500 people attended the Closing Social of the Elder Conservatory last Saturday night and this morning. A fine program of music was arranged by the faculty of the Conservatory and the students.

A happy spirit pervaded the assembly hall, the music was of a high order, and the entire program was one of enjoyment.

The concert was a complete success and the conservatory will continue to provide a fine program of music in the future.

DR. WHITTLESEY DAVIES

The Gambier, the Edinburgh University magazine, in its last number, devotes a considerable amount of space to Dr. Whittlesey Davies, who was a student at the University and received his Bachelor of Arts degree in 1829.

The article is a biographical sketch of Dr. Davies and a summary of his scientific work. It is written by a well-known Edinburgh journalist and is considered to be one of the best-known works on the subject.

India over 200,000 square miles, of which 100,000 are under complete Conservancy. Besides augmenting the natural resources, the forests are productive, and yield a net revenue yearly of more than a million sterling. In an interesting dispatch addressed to the Indian Government in 1852, Sir Charles Wood urged the need for promoting afforestation in order to reduce the drain on the natural resources of the country, and to provide timber for railways and public works. He reminded the authorities that the Government must only be expected to wait long enough to reap the benefit of a joint stock company. The forest front is being steadily advanced by the Government, and in the last few years, the number of trees planted has increased fourfold. The Government has spent a large amount of money on forestry works, and the result is a steady increase in the forest area.

A LESSON IN FORESTRY.

Correspondence to The Times (London) a month ago, and which was published in the Sydney Morning Herald, shows that the Government is not losing sight of the forestry question. The correspondent stated that the Government has wisely taken the advice of Sir Charles Wood, the first Lord Haddo, and the forest works are being carried out on a large scale. The correspondent also mentioned that the Government is considering the establishment of a forestry school.

The annual Commemoration, in which the University of Adelaide will be celebrated, will be held on the 1st of January. The Dean of the Faculty of Arts, Mr. J. H. Wills, and the Chancellor of the University, Mr. W. J. Widdicombe, will address the assembled students.
