THE UNIVERSITY OF ADELAIDE

Award of Scholarships.

The Council of the University of Adelaide has decided to award the following scholarships for the session 1929:

- $200 to each of the following students for two years:
  - John Howard Clark Prize—Professor J. H. Clark Prize
  - W. B. B. Prize—W. B. B. Prize
  - W. T. B. Prize—W. T. B. Prize

- $50 to each of the following students for one year:
  - E. R. B. Prize—E. R. B. Prize
  - J. W. B. Prize—J. W. B. Prize
  - J. W. B. Prize—J. W. B. Prize

- $25 to each of the following students for one year:
  - E. R. B. Prize—E. R. B. Prize
  - J. W. B. Prize—J. W. B. Prize
  - J. W. B. Prize—J. W. B. Prize

- $15 to each of the following students for one year:
  - E. R. B. Prize—E. R. B. Prize
  - J. W. B. Prize—J. W. B. Prize
  - J. W. B. Prize—J. W. B. Prize

- $10 to each of the following students for one year:
  - E. R. B. Prize—E. R. B. Prize
  - J. W. B. Prize—J. W. B. Prize
  - J. W. B. Prize—J. W. B. Prize

- $5 to each of the following students for one year:
  - E. R. B. Prize—E. R. B. Prize
  - J. W. B. Prize—J. W. B. Prize
  - J. W. B. Prize—J. W. B. Prize

These scholarships will be awarded to the students who haveshown the greatest promise of success in their studies and who have been recommended by their teachers.

TARCOOLA ABORIGINALS

American Scientist Inspects MOST PRIMITIVE PEOPLE

"Australian aborigines are probably the most primitive people in the world," said Professor S. H. Emery of the Australian National University, when he visited Tarcoola, where he stayed at an aboriginal mission. Professor Emery believes that the aboriginals have preserved the earliest stage of the evolution of man, and that the aborigines are the lowest of the human family tree.

Professor Emery studied the aboriginals for science in the fact that they were living in the same conditions as they were living in the stone age, and he was impressed by the simplicity of their lives. They had no use of the modern tools and had to live on the resources of the land.

The aborigines were more melodious than white men, said Professor Emery. They had a language which was very musical, and they had a rich and varied vocabulary.

ELDER CONSERVATORIUM

On Saturday there was a special concert for the benefit of the Aborigines, and it was attended by the Governor, Mr. W. H. Foot, and many other prominent citizens. The concert was held in the auditorium of the Elder Conservatorium, and it was a great success. The programme was well arranged, and the performers were all equally good.

The money raised at the concert will be used for the benefit of the Aborigines, and it is hoped that it will be able to provide them with some of the necessities of life.

NO RHODES SCHOLAR

The Rhodes Scholarship Selection Committee has decided not to make any awards this year. The Committee is of the opinion that the economic conditions are such that it would not be just and fair to select any students for this year.

WHEAT IN DRY YEARS

Improved Cultivation Pays MOISTURE CONSERVED

Commenting on this morning's report that Victorian farmers had grown 4,000,000 acres of wheat in the dry years, Dr. E. V. Ellis, the Victorian Chief Agricultural Engineer, said that it was the result of improved methods of cultivation.

The position was somewhat similar to that of Victorian farmers in the dry years. They had to conserve as much water as they could, and it was essential for the success of the crop.

"Since 1919," Dr. Ellis said, "there has been a great demand for water, especially in the eastern districts. It is essential that farmers conserve as much water as possible, and this has been done successfully in the past years.

"The farmers have been able to make use of the methods of conserving water which have been developed over the years, and the crop has been successful.

"It is really the application of science to agriculture., which has been the secret of the success of the crop.

UNEMPLOYMENT IN GREAT BRITAIN

The MacDonald Government on their defeat last week, left the evil of unemployment in the mother country unattended. They had always claimed, as against Conservatives and Liberals, that they were the most successful Government, but they made, in fact, no attempt to improve the conditions of industry.

They were not only opposed to the Bill, but they were also opposed to the Bill which was intended to give the workers a chance to work in the factories, and they had refused an opportunity of discussing the Labour Party's nationalisation scheme.

The position in this respect was not worse than that of the day of the last election, and the workers were left to their own devices.

The workers were left to their own devices, and they were left to their own resources. The workers were left to their own devices, and they were left to their own resources.
