A BELOVED HEAD MASTER.

The Rev. Canon Henry Gledswood, M.A., who has been London's foremost educationalist for his long service in the field of education, has passed away. The Rev. Canon Gledswood was one of the leading figures in the field of education in England, and his influence will be greatly missed. He was a man of great wisdom and experience, and his contributions to the field of education will be remembered for many years to come.

FINDING EMPLOYMENT FOR BOYS.

When the battle of Protection was being fought one of the stock phrases was, "What shall we do with our boys?" The answer was, "Try to get them a trade." It is interesting to note that the finding of local employment for boys has been permitted to drift.

In a vast number of instances when boys leave school, the school is expected to do a better job of finding them work than the local employment bureau. With the practical training which is now being afforded in State schools, this may be the case, but some boys will have been trained for specific trades. Whether there will be a demand for their particular skills, there will still be a considerable quota who will find it difficult to find anything that is available at the moment. They enter into blind-alley situations and unemployable conditions, which is unsatisfactory in all forms.

This is a method, or lack of method, impressed one of the country schoolmasters of New South Wales, and he conceived the idea of establishing a local employment bureau for boys in connection with the evening estimation classes. It was a good innovation, and the employers of the district and the members of the school agreed that they should cooperate in this new venture. So far the experiment is in its initial stage, but good results should be0.

In connection with the universities in America a similar scheme has been found to be wonderfully effective. Encouraging results are also accruing from the recently established Employment Bureau in connection with Adelaide University. Of course, those bureaus are wider in their appeal, and the enthusiasm of the students is greatly inspired by the friendly family feeling and prevent in a measure the eternal flow of country workers to the capital cities.

That in itself will be of value from an economic standpoint, and also benefit the country. It is also a step in the right direction of the restraining influences of homes, friends, and old associations often to fall into useless habits.

Apart from all other considerations, the interest displayed by employers in the scheme is a gratifying one. The employers are also very pleased to have employer and employed a better industrial understanding. It should also assist in bringing about that personal interest between worker and employer. There is a certain spirit of the old-time friendliness observed in the United States, and to which, among other things, he attributed industrial progress in that country.

SAFE Guard DELEGATES.

WHAT IS MUSEUM?

The secretary of the South Australian branch of the Australian Association for the Advancement of Science (Mr. W. L. Coates) has been awarded a gold medal for his contribution to the field of education. He yesterday conducted a lecture to a large audience on the subject of "Museums." The lecture was well received, and the audience was greatly impressed by the speaker's knowledge of the subject. The secretary is a well-known figure in the field of education, and his contributions to the field will be remembered for many years to come.

TRADING RESEARCH WORKERS.

A NEW ORDER OF BUSINESS.

The action of the Commonwealth Government in granting a new order of business for trading research workers is of great importance. The new order will enable the workers to carry out their research work in a more effective manner, and it will also enable them to receive proper recognition for their work. This is a step in the right direction, and it is to be hoped that the government will continue to support the workers in their research work.

Adv. 1.26

THE UNIVERSITY BALL.

The University Ball will be held on the 1st of August, and as this is the first ball of the season, it will be necessary to take suitable precautions to prevent the spread of infectious diseases. The University authorities have issued a number of health regulations, which will be strictly enforced.

The University of Adelaide, South Australia, is one of the leading universities in the country, and it is to be hoped that the ball will be a success.
