Prof R.A. Fisher

Department of Genetics

Whittingham Lodge, Trumps Way,  
Cambridge.

Dear Professor Fisher,

I asked Quenouille to enquire if I could see you for a few minutes sometime this coming week, and I understand he has arranged with you for me to visit you on Wednesday afternoon (30th). My reason for troubling you is that C.B. Williams has been proposing to me certain problems connected with logarithmic series, and I should like to

have a word with you ~~at~~ the subject of  
your 1943 paper (Fisher, Corbett, & Williams,  
J. Anim. Ecol.).

Unless I hear from you to the contrary,  
I will call on you on Wednesday at about  
3.0 pm. I shall be in Cambridge on  
Tuesday & Wednesday, and if any other  
time would be more convenient perhaps you  
would let Greenwood know.

Yours sincerely,

J. Anscombe
