1st November, 1955.

My dear Eric,

The reference you asked for is *Annals of Science* 1:115-137, 1936, but the offprint itself is now past praying for. I have, however, recently written for Dennis Dobson Ltd. a commentary on Mendel's paper, which they are republishing, of which I enclose a copy which I hope you may return as it is possible that I shall need it before the thing is printed.

Sincerely yours,

Enc.

[Fisher's commentary and marginal notes on Mendel's paper were not published until 1965. See *Experiments in Plant Hybridisation*, G. Mendel; Oliver & Boyd].
