Dear Fisher,

Would you be so very kind as to criticize - as stringently as you like - the enclosed paper. It is going to be published and circulated before the next International Sea Fisheries Conference which happens at Copenhagen next June 4th. I am attending the conference to make suggestions as to collection of data for studying the question of size. These data matters are very important in getting knowledge.
ledge of life histories of fish, and racial matters. So I don't want to make any "blooeyes" in what is intended to be a rather fundamental piece of work. I am afraid the thing is rather urgent, as publication is in Copenhagen and proofs take a long time coming through.

I shall be tremendously grateful for your attention if you are at all likely to want several copies of the paper when published.
MINISTRY OF AGRICULTURE AND FISHERIES.

All communications to be addressed to:

THE DIRECTOR.

Fisheries Laboratory
Lowestoft.

Reference No. ......................

would you please let me know, as they don't print off many spare copies. Break up the type fairly soon.

yours sincerely,
