Aug 20 - 30

Cripps's Corner,
Forest Row,
Sussex.

My dear Fisher,

I have looked at the enclosed again, and I really have no criticism to make on it as a representation of my father's views. I guess he would have been a bit surprised that such a complicated explanation was needed.

I see you have been having a go at Pearson. It seemed to me a wild deduction from such a basis. These must always, I think it, be some segregation...
In every species, and would not
the result be a perpetual
Scattering or divergence from the
mean? Would not warm
marriage do this? No answer,
for I feel sure with an idea
as Pearson (who died a natural
death).
