IDLEROCKS,
STONE, STAFFS.

Dear Fisher,

Purcell writes civilly to say he will bring the matter before his Society in July. He adds that he personally is against his Geological Society making an engenee [sic] motion lest its aims should be "misunderstood by the public". I do not see that, even if that did occur, it would do much harm!! Pete Cutler some day, please. He seems to have seen me at the Council, I gather. No answer needed yours d-Darwin
