June 14th [1926]

Cripps's Corner,
Forest Row,
Sussex.

My dear Foster,

I have just been reading your essay on the very great satisfaction. I will not pause to express whether it is too flattering to my efforts, but I will say without doubt that the brief general essay on Eugenics seems quite admirable.
Science Progress does not care to let us have it for our Review we must see if they will at all events allow leave a considerable number of reprints.

There is only one line to which I want to call attention, this only with reference to the rating of our promise.

You say "not a science" possibly you would reconsider this phrase with a view to possibly substituting unde
some what like the following—

"Not all science but all its in-
spiration drawn from..."

how y. you have the slightest

objection on the formulas James

style, a scheme to which an

attention please find it en-

tirely out of your thought.

I have been very

anxious to arrange an office

meeting at which Hayell

and lady C. could attend,

the former for financial reas-

and the latter as I hope she

will help in the choice of a

new member of the staff.

If the date selected should

unfortunately be one on which
you cannot attend d occurs to me to suggest the possibility if you are able to talk the matter over with lady chambers so that she should be thoroughly acquainted with your views. if you see culler i will say much the same thing to him.

again thanking you for the nice kind way in which you speak of my book

yours sincerely

dear [Name]
