Saturday

DUDLEY PLACE
[late 1915?] S.W.

Dear Fisher,

I saw Sidney Gube yesterday. He had asked me to write a paper for the Statistical. I have agreed - "On the Statistical Enquiries needed after the War in connection with Eugenics." Heaven knows what I am going to say! But I now write because he told me that both Pearson &
snow have written on the time you are now working on—Snow's was, I think he said, a paper for the Royal Soc. He had written something short for (?) a congress on hybridization some five years ago in London (?) I am not sure if you know this. It is a constant story in science
now to find one self worked in ground already creased. But it is annoying. I thought I would let you know.

Yours in haste,

S. Darwin
