7th May, 1958.

Dear Mr Cirkar,

I am sending back the proofs of "The Genetical Theory" at once because there are, as you will see, a few things to attend to, and I do not want to delay the edition further. If it does not come out now it might as well be never. I have put in a few details under 'By the same author' referring to four other books instead of one, and there is a patch of new material I think in the fourth chapter where the symbol $a$ has come in in place of $x$, no doubt through my fault which I should now be anxious to correct. Some pages seem to be missing, but that cannot be helped.

Sincerely yours,

The new material reads very well.

Yours,

23-5-58. Regret proofs have been delayed.
