

16th November, 1955.

Dear Fieller,

I have your letter giving the date for the Biometric Committee and notice, though not yet date, of the Annual General Meeting. For the latter I have suggested to Mrs. Wallace, of this Department, that she should offer a short paper on the use of affinity data in chromosome mapping. I forget whether you require a summary of such proposed communications, and suppose you will write for it if you want it.

Sincerely yours,
