My dear Ron,

How exceedingly kind of you. I will get the data together and send it to you, as you are so very good as to suggest. It is of course magnificent to have you analyse it, and you will know how delighted Downe will be, as well as I. I will send you the information shortly.

It is most awfully kind of you to suggest that I should come to Cambridge. It would certainly be delightful, and a fine opportunity to discuss the data and to talk over all I have in mind there. May I come towards the end of the term or soon after it is over?
The best dates for me would be the break-end of either:
November 27th
or December 11th.
If these do not suit, I could suggest others.
dates. Possibly the latter would be the better: (a) it gives me more time and (b) it is easier to fit within one term, and I have Advanced Genetics (lecture and practical) on Saturday mornings. As the Zoologists and Botanists both attend, it would upset the time-table of both schools if I were to attend it. Consequently I could not come until after lunch on the 27th November.

Thank you so much for your kindness,
my dear Ron,

Yours truly

However, I could quite well wait for that meeting.
