My dear Freder,

Thank you so much for your letter (which will have crossed me before you in the post). I am so glad to hear that you are going to get a holiday in the East. I am sure you must need it. I see that you think of going to Plymouth, and perhaps to the curious stromatolite colony which I am sure needs investigation. How I wish it were possible to do it together! It would have been a very great joy to me — but the undergraduate returned today. It would be most awfully nice if we
could do something of the kind together some day?

You will have heard that the Annual General Meeting of the Zoo has been postponed indefinitely from the 29th. I do not know what to make of this. I am so glad to hear that people seemed to have enjoyed the meeting the other day. I heard several people saying that they thought it a success.

How very kind of you to suggest a visit to Harpenden. That would be delightful; and then may well be points in regard to the blood-groops, and other matters, to discuss. Cellimopha domimata does not emerge in the open until July, so all is well as far as that goes. The only mock-and-plain that I should find it difficult to get away (as far as I know) is that of the g6, so any of them which you
Suggest (the 16th, 23rd, or 30th) would suit me. So please select what you would find most convenient (that of the 16th would do very well as far as I am concerned). I shall look forward to hearing this.

Best love wishes to Ruby,

Eva Jones.
