Dear Professor Fisher,

I have read your paper
on "The Statistical Utilization of Multiple
Measurements" in Ann. Eug. 8 and note that
you suggest the desirability of the lower 5%
points of your B distribution.

I should like to say that I
have in preparation a paper which I hope
will be accepted for Biometrika, containing a
table and a graph which will provide the
necessary information.

Yours truly,

F. Lawton

Professor R. A. Fisher
