Professor R.A. Fisher
Galton Laboratory
Rothamsted Experimental Station

Dear Professor Fisher:

Your letter of February 24th arrived very promptly in spite of Mr. Hitler.

You mentioned the delays in getting permission to visit the United States. If there is anything we can do to help please let me know. It would be easy to get a letter from our Department to the proper authorities over there.

I do not expect to get down to Miss Cox' summer classes although I would like to very much. The exchange difficulties are burdensome now and may become worse. We are not allowed to buy more than a bare minimum of American money. Just enough to keep us alive and sometimes it is impossible to get any at all.

I hope that George will be able to visit us before he goes back to England but there is a possibility that on coming through Winnipeg he may not have an opportunity to stop off.

Sincerely

C.H. Goulden

C.H. Goulden
