20th March, 1957.

My dear Hopkins,

I am forwarding, under separate cover, a copy of a paper which I shall present to the Biometric Society, British Region, next month (April 25th), and which I should like to publish in Biometrics. Some of the ideas may be sufficiently novel to amuse your readers. I am sending a carbon copy, which is, I think, in good condition, with a photographic print of Figure 2, Figure 1 being, I think, within the capacity of ordinary printers.

Shall I be seeing you at Stockholm?

Sincerely yours,
