

22nd December, 1952.

My dear Hoopers,

I thought you might like to see the final section, with numerical examples, of the paper I am sending in to the Royal Society. Of course, if you fix your publication in time, i.e. some time in the next three or four months, I could add it to the bibliography with a complete, or incomplete reference.

I should be glad to have the copy back when you have finished with it.

Sincerely yours,
