May 3, 1937

Dear Professor Huntington,

I am sending you, to-day, a copy of the second edition of *The Design of Experiments*, hoping that it may be a pleasant reminder of the stay with you last Fall which my wife and I enjoyed so greatly.

As you will see, I have tried to make the principles of design intelligible without much mathematical notation, and also without disguising their intimate association with statistical methods of the analyses of the results.

With kind regards to Mrs Huntington,

Yours sincerely,
