Dear Prof. Fisher,

I shall be very grateful if you can let me have a reprint of your article entitled "The Comparison of Samples with Possibly Unequal Variances". If you have another spare copy, would you be so kind as to send one to Mr. H.L. Manning, Cotton Research Officer, Kingstown, St. Vincent, B.W.I.?

Yours sincerely,

[Signature]

Geneticist

P.S. Hope you are able to live & work as comfortably as possible under present circumstances. Our admiration for the way England is maintaining the stiff upper lip is unbounded. So far we are practically undisturbed. The American occupation has its inconveniences, but we work by day & sleep by night with nothing worse overhead than naval training planes or American bombers.
