October 12, 1942

Dear Korenchevsky,

I will notify the printer to have a dozen proofs pulled of your paper when it is set up. This will not be as you say in your letter, a final proof, for I imagine you do not want to wait for that, but would rather have the material as soon as possible, making such corrections as are necessary in manuscript. So far as possible during the paper shortage I am avoiding second proofs, i.e., they will only be sent when the corrections are more than trifling.

Yours sincerely,
