Dear Mr Spedan Lewis,

1. Some time ago you suggested that you would see my experiment with Gallina, some time in April.
2. I hope to have Mr Pease the Cambridge geneticist to see them on Thursday, April 17th., and if you would happen to be free this might be a good opportunity for you to see the experiment yourself.
3. I should be very glad if you could lunch with me that day and we would see the chicks in the afternoon. There should be several broods of this year's hatching out by then.
4. The two birds sent by mistake from Leckford have now been exchanged, and there is every prospect of a second successful year.

Yours sincerely,
