July 22, 1941

Dear Landsborough Thomson,

Many thanks for your letter of July 21st, and for the copy which I shall see is brought to the notice of the College authorities. I do not at all understand what has led them to take this line, which seems to me contrary to the agreement by which the Galton Laboratory was established here. However, at present they appear to be obdurate, and it is by no means impossible that my efforts will be frustrated.

Yours sincerely,
