July 16, 1941

Dear Landsborough Thomson,

Many thanks for your helpful letter. I believe it would be the best plan to do what you suggest, namely to write me an opinion which I might hope would have some influence with the College authorities.

Miss Simpson's secretarial work has, of course, given her a good deal to do in correspondence, arrangements about the transmission by rail, car, etc of packages of forms, the avoidance of confusion between different batches - some perhaps from different centres - and such general organisation. She has, however, given a large amount of her time to the actual laboratory work of sorting, counting and compiling the returns.

Yours sincerely,
