My dear Myslivec,

Thank you for your letter explaining how you came in contact with Mr. Richardson. I suppose your Embassy had the information that you had qualifications in chemistry, and that Richardson was looking for someone willing to do some chemical work for him. This explains much that was strange in his proposals, which had, indeed, made me suspicious of his bona fides.

I understand, however, that you are not interested in any chemical work he is likely to find for you, so I will not make any further attempts to pave the way for an acceptance of his plan.

I thought he might be an enemy agent trying to get information about you, but perhaps I was too suspicious.

Yours sincerely,
