Galton Laboratory,  
Rothamsted Experimental Station,  
Harpenden, Herts.  

[October 1939]

Dear Myalevic,

I have been approached by a Mr Richardson, who describes himself as an industrial consulting chemist, with a project to employ you, while you are still free, in chemical research, possibly at Rothamsted. Perhaps you will tell me what you know of Mr Richardson, and what encouragement you have given him in this proposal.

Yours sincerely,
